RESEARCH EXPERIENCE

University of Helsinki 2017 - Present
Doctoral candidate *Helsinki, Finland*

· I concentrate on privacy-preserving (differentially private) machine learning with the general aim of combining new theoretical insights with practical implementations. My research has mostly focused on combining distributed (federated) Bayesian learning with differential privacy.

University of Helsinki June 2016-2017
Research assistant *Helsinki, Finland*

· Working on probabilistic graphical models and on differential privacy.

Tutkimustoimisto Kide Oy January-December 2015
Data analyst *Helsinki, Finland*

· Doing statistical analysis and visualisation.

IFO Institute February-March 2014
Undergraduate intern *Munich, Germany*

· Assisting in statistical research by running statistical analysis and doing visualisations.
